Total of \$700,000,000 Must Be Reached by Saturday—Committee Confident.

NEW YORK, Oct. 9.—The liberty loan committee for the second federal reserve bank district has set its goal at \$700,000,000 as the total that must be reached by Saturday and even in the face of a slump in subscriptions over the week-end and yesterday the committee expressed confidence today that this figure would be passed at the time set.

The estimated total at the close of business yesterday was \$250,000,000, which is more than \$180,000,000 behind the basis of the daily allotment. Actual subscriptions tabulated reached \$217,350,000 while those that have been received by the federal reserve bank with the initial payment of two per cent, reached \$156,250,000.

SPECULATION IN COTTONSEED OIL

Exchange Managers Forbidden to Gamble Further in This Commodity.

NEW YORK, Oct. 9.—Speculation in cottonseed oil in trade and outside interests on the New York produce exchange was forbidden today by the board of managers of the exchange at the instance of the food administration in Washington.

This action by the food administration followed upon sharply advancing prices for cottonseed oil culminating yesterday in a jump of 175 points to 19½ cents a pound, a record never before reached. So-called hedge selling under certain conditions is to be permitted.

Speculative trading in cottonseed oil for any delivery, "either by trade or outside interests, is prohibited," reads the ruling by the managers.

Hedge Selling Restricted.
"Hedge selling for protection against seed purchases or sales of refined oil against purchases of crude oil or purchases by consumers or exporters are permissible, but such operations shall be confined to legitimate trade interests only and shall be of the smallest possible proportions consistent with the purpose of this rule."

Future trading of this kind will be confined to current months and two months ahead and to the closing out of old contracts for any month. Daily fluctuations in price beyond one cent a pound are forbidden.

FOREST SERVICE TO AID CATTLE OWNER

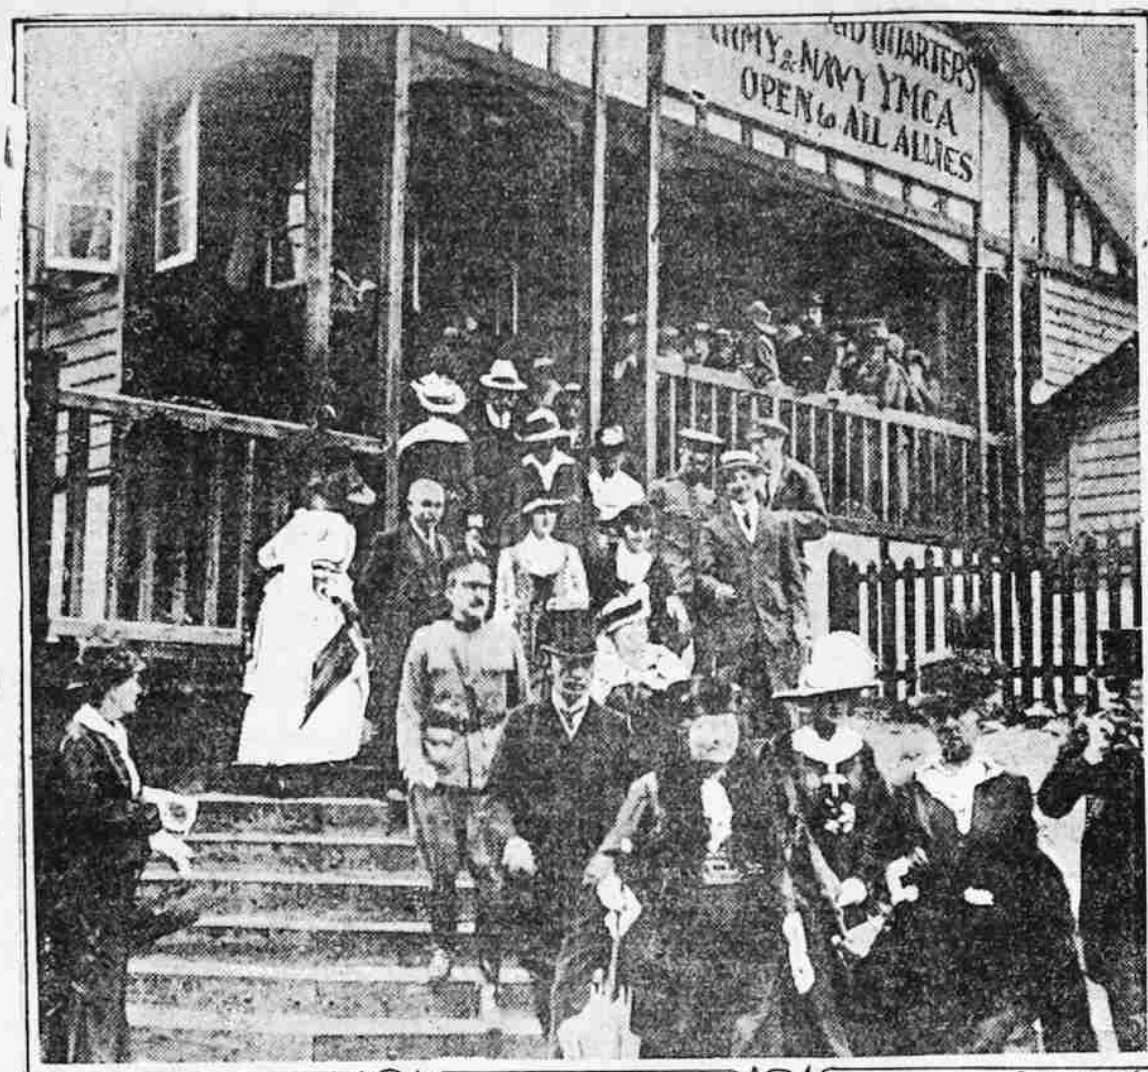

A plan whereby the small cattle owner may dispose of his stock at the best price or buy cattle when he desires them, has been worked out for the benefit of the Utah ranchers and farmers by the forest service. The plan will be effective, however, all over district No. 4 of the forest service. It was proposed at a recent meeting of county agents in Salt Lake, Mark Anderson, grazing inspector of the forest service being present at the meeting and co-operating with officials of the government extension department were there.

The plan is to list all of the stock for sale and all of the stock wished for purchase on the ranches through district No. 4. Then when a buyer wants cattle he will only have to consult the forest service department or the local county agents, who operate in co-operation with the service and the extension division of the department of agriculture for the furtherance of the plan. The first steps to be taken in this plan will be a complete survey of the cattle in district No. 4. It is thought that this method will give the small cattleman a better chance to dispose of his stock and a better chance to buy stock when he wishes to buy. When a buyer wishes to get cattle, say in Weber county, he will need only to see the county agent, who can furnish him with a list of all the cattle available in the district he wishes to visit. He will be

Premier Kerensky today informed all those selected today of their appointment to the new coalition cabinet. M. Masloff, who was offered the

SALT LAKE, Oct. 9.—Protest against a proposed advance in light service rates by the Utah Power & Light company was received yesterday by the state public utilities commission from business men of American Fork, the paper being signed by Alma Greenwood and John Hunter as representative committeemen. It is proposed by the company to raise the minimum monthly light rate from \$1 to \$1.11. The complaining and protesting committeemen say that they intend to attack the present rate of 10 cents per kilowatt hour as being neither just nor reasonable and the present minimum of \$1 as discriminatory. An investigation is demanded to facilitate the protest against the old rate and the proposed advance.

MEXICO TO BUY CORN

MEXICO CITY, Oct. 9.—The sum of \$200,000 has been made available for the immediate purchase by the government of corn in the United States and a representative of the government has been sent to Kansas City to open negotiations as soon as the permission of the food control board is obtained. It is believed that Mexico will have no difficulty in getting the supplies required actually to relieve distress, provided the government makes it impossible for food imports to be cornered or made the basis of exorbitant profits. Recent frosts have done great damage to the corn on the central plateau and the crop will be far from normal.

For instance—one spoonful of Calumet will positively do the work of two spoonfuls of most other kinds. You use only a level teaspoonful to a cup of flour. With other brands you must use twice as much. You use the smallest amount of Calumet because you get the greatest gas strength. Besides—Calumet never fails—stops all bake-day losses—reduces bills for baking ingredients. The great savings of Calumet are shown in these results.

Order a can today—try it. Prove for yourself the truth of these statements.

Calumet contains only such ingredients as have been approved officially by the U. S. Food Authorities.

MAZOLA

is the choice of housewives who want both quality and economy

THE American housewife will not give up any cooking medium that she has used for years until she has actually proved that something else is better.

So with Mazola, the pure oil pressed from American corn, for deep frying, sautéing, shortening and salad dressings, which has become such a factor in the homes that demand quality food.

Mazola has not been established in a day. It has taken months of trial on the part of housewives who at first were reluctant to give up butter, lard or compounds.

Today higher food quality is only one of many reasons for using Mazola. Since it is a vegetable oil, it is an important factor in Mr. Hoover's campaign to save animal fats. And thousands of housewives have found that it also materially reduces the cost of their cooking.

Olive oil is so scarce and high priced now-a-days that you will do well to use Mazola when you want a really delicious salad dressing.

You can get Mazola from your grocer in pint, quart, half-gallon and gallon tins. The larger sizes are most economical. Also ask your grocer for the Mazola Book of Recipes, or write us direct—free on request.
